Android Developer Intern

Dinasti Motekar

2021

Create company profile mobile application using flutter. The apps contain setting, review page, home, article, video page, video player, caption, login and logout.

IT Operational

PT Evolusi Teknologi

2022-2023

Be a vendor for information system (SIM RS) implemented in RSUD KARAWANG.

- Maintaining and monitoring system and transactions.
- Socializing how to use the system or system update to users (such as doctor, nurse, dentist, accountant, admission, cashier, etc).
- Receiving any suggestion and complain from users.
- Problem solving on every problems that occur.

IT Staff

RSUD KARAWANG

2023-Present

conducting problem analysis, receiving incoming problem reports, recording problems, providing solutions or suggestions in the form of a system framework resulting from coordination with related parties, presenting them to the IT team and socializing the results of the implementation to users and guiding them. I also help with support and programming. support such as handling printers, mice, keyboards, LAN cables, problematic LAN sockets, creating VPN accounts for users, adjusting VLANs, handling system complaints related to applications (such as problems with data) so often interacting with the database, and creating queries for reporting purposes. As for the programming side, I was asked to help complete requests for additional features or reports, create a ticketing complaint system, develop especially from the security side for the RSUD website.
